600 Series Stain Powders

Finely ground pigment powders

For toning, padding or re-graining a repair area.

These are very finely ground organic and inorganic pigments used for touch-up. These are the very best pigments available and are the same ones we use in our own manufacturing. They can be applied with our grain liquid, padding lacquer or pretty much any vehicle. They blend together easily and will offer a very crisp (not muddy) tone to your repair. Their light fastness qualities are excellent.

605 Raw Sienna **618 Burnt Sienna** **624 Burnt Umber** **631 Raw Umber** **637 Black** **681 White**

600 Red **600 Yellow** **600 Blue** **600 Orange** **600 Green**

Aniline Dyes

Brilliant alcohol soluble aniline dyes for making your own stains or touch-up colors

Now available, the same colorfast, alcohol soluble aniline dyes that we use for making our Touch-up Markers. Use with our grain liquid or most alcohol based products (padding lacquers). Mix red and yellow to make orange and add black to increase the brownness - by intermixing all three colors you can come up with most brown tones on the market. The resultant colors will be extremely crisp and transparent.

Colors:

(1oz & 4 oz)

- Aniline Red
- Aniline Yellow
- Aniline Black
