

Premier

200 Series Touch-up Markers

Valve Marker with stain & finish in one package.

A quick one-step repair for scuffs, scratches or sandthroughs.

Shake well, remove the cap and press the tip down to feed the product to the tip. The valve marker allows you to control the amount of marker fluid you apply giving you total control on those complex touch-ups. The valve also allows the dispensing of thicker pigmented fluids which are necessary in the whites, off-whites and opaque colors. Premier Touch-up Markers contain the stain and the coating all in one so it is not necessary to clear coat after touch-up, although a clear coat can be applied for extra durability. The touch-up markers are formulated using state of the art dyes and resins giving excellent adhesion and colorfastness. They are formulated to apply smoothly then dry very quickly (in a matter of seconds) to a very durable repair. All of the

ingredients in our formulations are acid stable and therefore can be used under or over acid catalyzed finishes without concern of burn-out or color change.
